Using Depth and Complexity Icons to Plan for Improved Teaching and Learning

Participants in this workshop will learn about the eleven Depth and Complexity Icons and how they can be used to enrich and challenge students in the regular classroom. The icons are based on concepts such as **patterns** and **big ideas**. Each is represented as an image and is a part of a set of images that can be downloaded and used when writing Learning and Teaching units. They assist with developing working memory, appeal to students with a strong preference for visual learning and help all students develop further their visual thinking skills. A set of Content Icons and a set of Maths Icons will also be presented.
