Thinking Mathematically
With Technology

in Years 3 - 7

An increasing number of Information and Communication Technology tools are available for use in the mathematics classroom. This program will explore a range of ICT resources and teachers will have the opportunity to critique, trial and implement them in their classrooms, considering how these may be used for mathematical learning. In between sessions teachers will be encouraged to try ideas presented.

This program will offer opportunity to:

- Explore learning and teaching with the Internet
- Consider the roles of ICTs in mathematics
- Review sites and resources
- Plan, document and implement a unit of work / strategy

Workshop Dates

9.15am – 3.15pm
Monday 22 October
Tuesday 23 October
Friday 23 November

All sessions will be held at
Concordia College
The Suaviter Room
45 Cheltenham Street
Highgate

Please bring a memory stick
Confirmation of Registration will be sent to all participants
Morning tea and lunch will be provided
